Index to Volume 71, 2006

	Issue	Page
A case history of time-lapse 3D seismic surveys at Cold Lake, Alberta, Canada, J. Helen Isaac and Don C. Lawton	4	B93
A fast and accurate frequency estimation method for canceling harmonic noise in geophysical records, Antoine Saucier, Matthew Marchant, and Michel Chouteau	1	V7
A filter to improve seismic discontinuity data for fault interpretation, Arthur E. Barnes	3	P1
A holistic approach to inversion of frequency-domain airborne EM data, Ross Brodie and Malcolm Sambridge	6	G301
A limited-memory quasi-Newton inversion for 1D magnetotellurics, Anna Avdeeva and Dmitry Avdeev	5	G191
A method for determining gas-hydrate or free-gas saturation of porous media from seismic measurements, Matthias Zillmer	3	N21
A methodology for 7D warping and deformation monitoring using time-lapse seismic data, Stephen A. Hall	4	O21
A multiscale study of the mechanisms controlling shear velocity anisotropy in the San Andreas Fault Observatory at Depth, Naomi L. Boness and Mark D. Zoback	5	F131
A new computational technique for processing transmission-line measurements to determine dispersive dielectric properties, Benedikt Oswald, Joseph Doetsch, and Kurt Roth	2	K31
A new elastic model for ground coupling of geophones with spikes, Guy G. Drijkoningen, Frederik Rademakers, Evert C. Slob, and Jacob T. Fokkema	2	Q9
A new formula to compute apparent resistivities from marine magnetometric resistivity data, Jiuping Chen and Douglas W. Oldenburg	3	G73
A new iterative solver for the time-harmonic wave equation, C. D. Riyanti, Y. A. Erlangga, R.-E. Plessix, W. A. Mulder, C. Vuik, and C. Oosterlee	5	E57
A new method for determination of magnetization direction, Neal Dannemiller and Yaoguo Li	6	L69
A novel application of time-reversed acoustics: Salt-dome flank imaging using walkaway VSP surveys, Mark E. Willis, Rongrong Lu, Xander Campman, M. Nafi Toksöz, Yang Zhang, and Maarten V. de Hoop	2	A7
A novel approach to the model appraisal and resolution analysis of regularized geophysical inversion, Michael S. Zhdanov and Ekaterina Tolstaya	6	R79
A pore-size scale model for the dielectric properties of water-saturated clean rocks and soils, Anthony L. Endres and Edward A. Bertrand	6	F185
A reusable implosive seismic source for midwater or seafloor use, LeRoy M. Dorman and Allan W. Sauter	5	Q19
A simple method of predicting S-wave velocity, Myung W. Lee	6	F161
A spectral numerical method for electromagnetic diffusion, José M. Carcione	1	I1
A survey of current trends in near-surface electrical and electromagnetic methods, Esben Auken, Louise Pellerin, Niels B. Christensen, and Kurt Sørensen	5	G249
A technique for identifying microseismic multiplets and application to the Valhall field, North Sea, Stephen J. Arrowsmith and Leo Eisner	2	V31
A theoretical overview of model-based and correlation-based redatuming methods, Gerard T. Schuster and Min Zhou	4	SI103
A 3D parametric inversion algorithm for triaxial induction data, Aria Abubakar, Tarek M. Habashy, Vladimir Druskin, Leonid Knizhnerman, and Sofia Davydycheva	1	G1
A 3D subsalt tomography based on wave-equation migration-perturbation scans, Bin Wang, Volker Dirks, Patrice Guillaume, François Audebert, and Duryodhan Epili	2	E1
A 2D multistage median filter to reduce random seismic noise, Cai Liu, Yang Liu, Baojun Yang, Dian Wang, and Jianguo Sun	5	V105
A weak-anisotropy approximation to multicomponent induction responses in cross-bedded formations, Tsili Wang	4	F61
Abdel Aal, Gamal Z., Induced-polarization measurements on unconsolidated sediments from a site of active hydrocarbon biodegradation	2	H13
Abma, Ray, 3D interpolation of irregular data with a POCS algorithm	6	E91
Abnormal transmission attenuation and its impact on seismic-fracture prediction — A physical modeling study, Mu Luo, Norio Arihara, Shangxu Wang, Bangrang Di, and Jianxin Wei	1	D15
Abubakar, Aria, A 3D parametric inversion algorithm for triaxial induction data	1	G1

	Issue	Page
Accounting for spatially variable resolution in electrical resistivity tomography through field-scale rock-physics relations, Kamini Singha and Stephen Moysey	4	A25
Accuracy of heterogeneous staggered-grid finite-difference modeling of Rayleigh waves, Thomas Bohlen and Erik H. Saenger	4	T109
Adam, Ludmila, Gassmann's fluid substitution and shear modulus variability in carbonates at laboratory seismic and ultrasonic frequencies	6	F173
Adaptive finite-element modeling using unstructured grids: The 2D magnetotelluric example, Kerry Key and Chester Weiss	6	G291
Adaptive multiple subtraction using independent component analysis, Wenkai Lu	5	S179
Adler, Frank, see Diallo, Mamadou S.	3	V67
Admasu, Fitsum, Autotracking of faults on 3D seismic data	6	A49
Airborne electromagnetic footprints in 1D earths, James E. Reid, Andreas Pfaffling, and Julian Vrbancich	2	G63
